

Didac'Ressources brings together people who do not normally have the opportunity to meet to create tools, share values and resources, and enable equal access to quality training and knowledge sharing for all.

CREATE

The GRAFs (research, action and training groups) of Didac'ressources bring together multiple competences to collectively invent innovative and playful tools for education, awareness-raising and questioning.

- Ludo-pedagogical case suitable for young neuropaths to combat the digital divide
- Taudis-Poly - interpellation game on unworthy housing
- Pedagogical tool for access to basic knowledge for all

BRING

Didac'resources collects and makes available many resources, in particular through its participatory website on various topics.

- Teaching French to adult migrants (FLE, FOS, FLI)
- Fight against discrimination
- Digital divide
- Topicality of training
- Pedagogical methods and interactive training tools

With the Didac' network

Didac'ressources links the actors of inclusion and training

TRAIN

Didac'ressources is a Datadock training organisation.

We offer a training catalogue for trainers and actors of inclusion and training tailored to your audience.

We also accompany training centres in their pedagogical engineering.

More generally, we organise training courses, workshops, meetings and events for access to knowledge and for the participation and enhancement of all.

THE POSSESSION OF KNOWLEDGE IS THE POSSESSION OF POWER

DIDAC'RESSOURCES IN BRIEF

- **CREATE**
Pedagogical, playful and innovative tools
- **BRINGS**
Resources and networks
- **TRAINING**
And provides access to training for all
